EXPLAINER

In colocation you rent power, not floor space.

$200 per kW per month: the median wholesale price across 23 markets

SWIPE →

Source: Coloprice Colocation Index, 26 Oct 2026

WHAT THE UNIT MEANS

$/kW/month is one kilowatt of committed IT load, for one month. Metered electricity comes on top.

Coloprice index definition of wholesale colocation.

WORKED EXAMPLE · 250 KW SUITE

$50,000

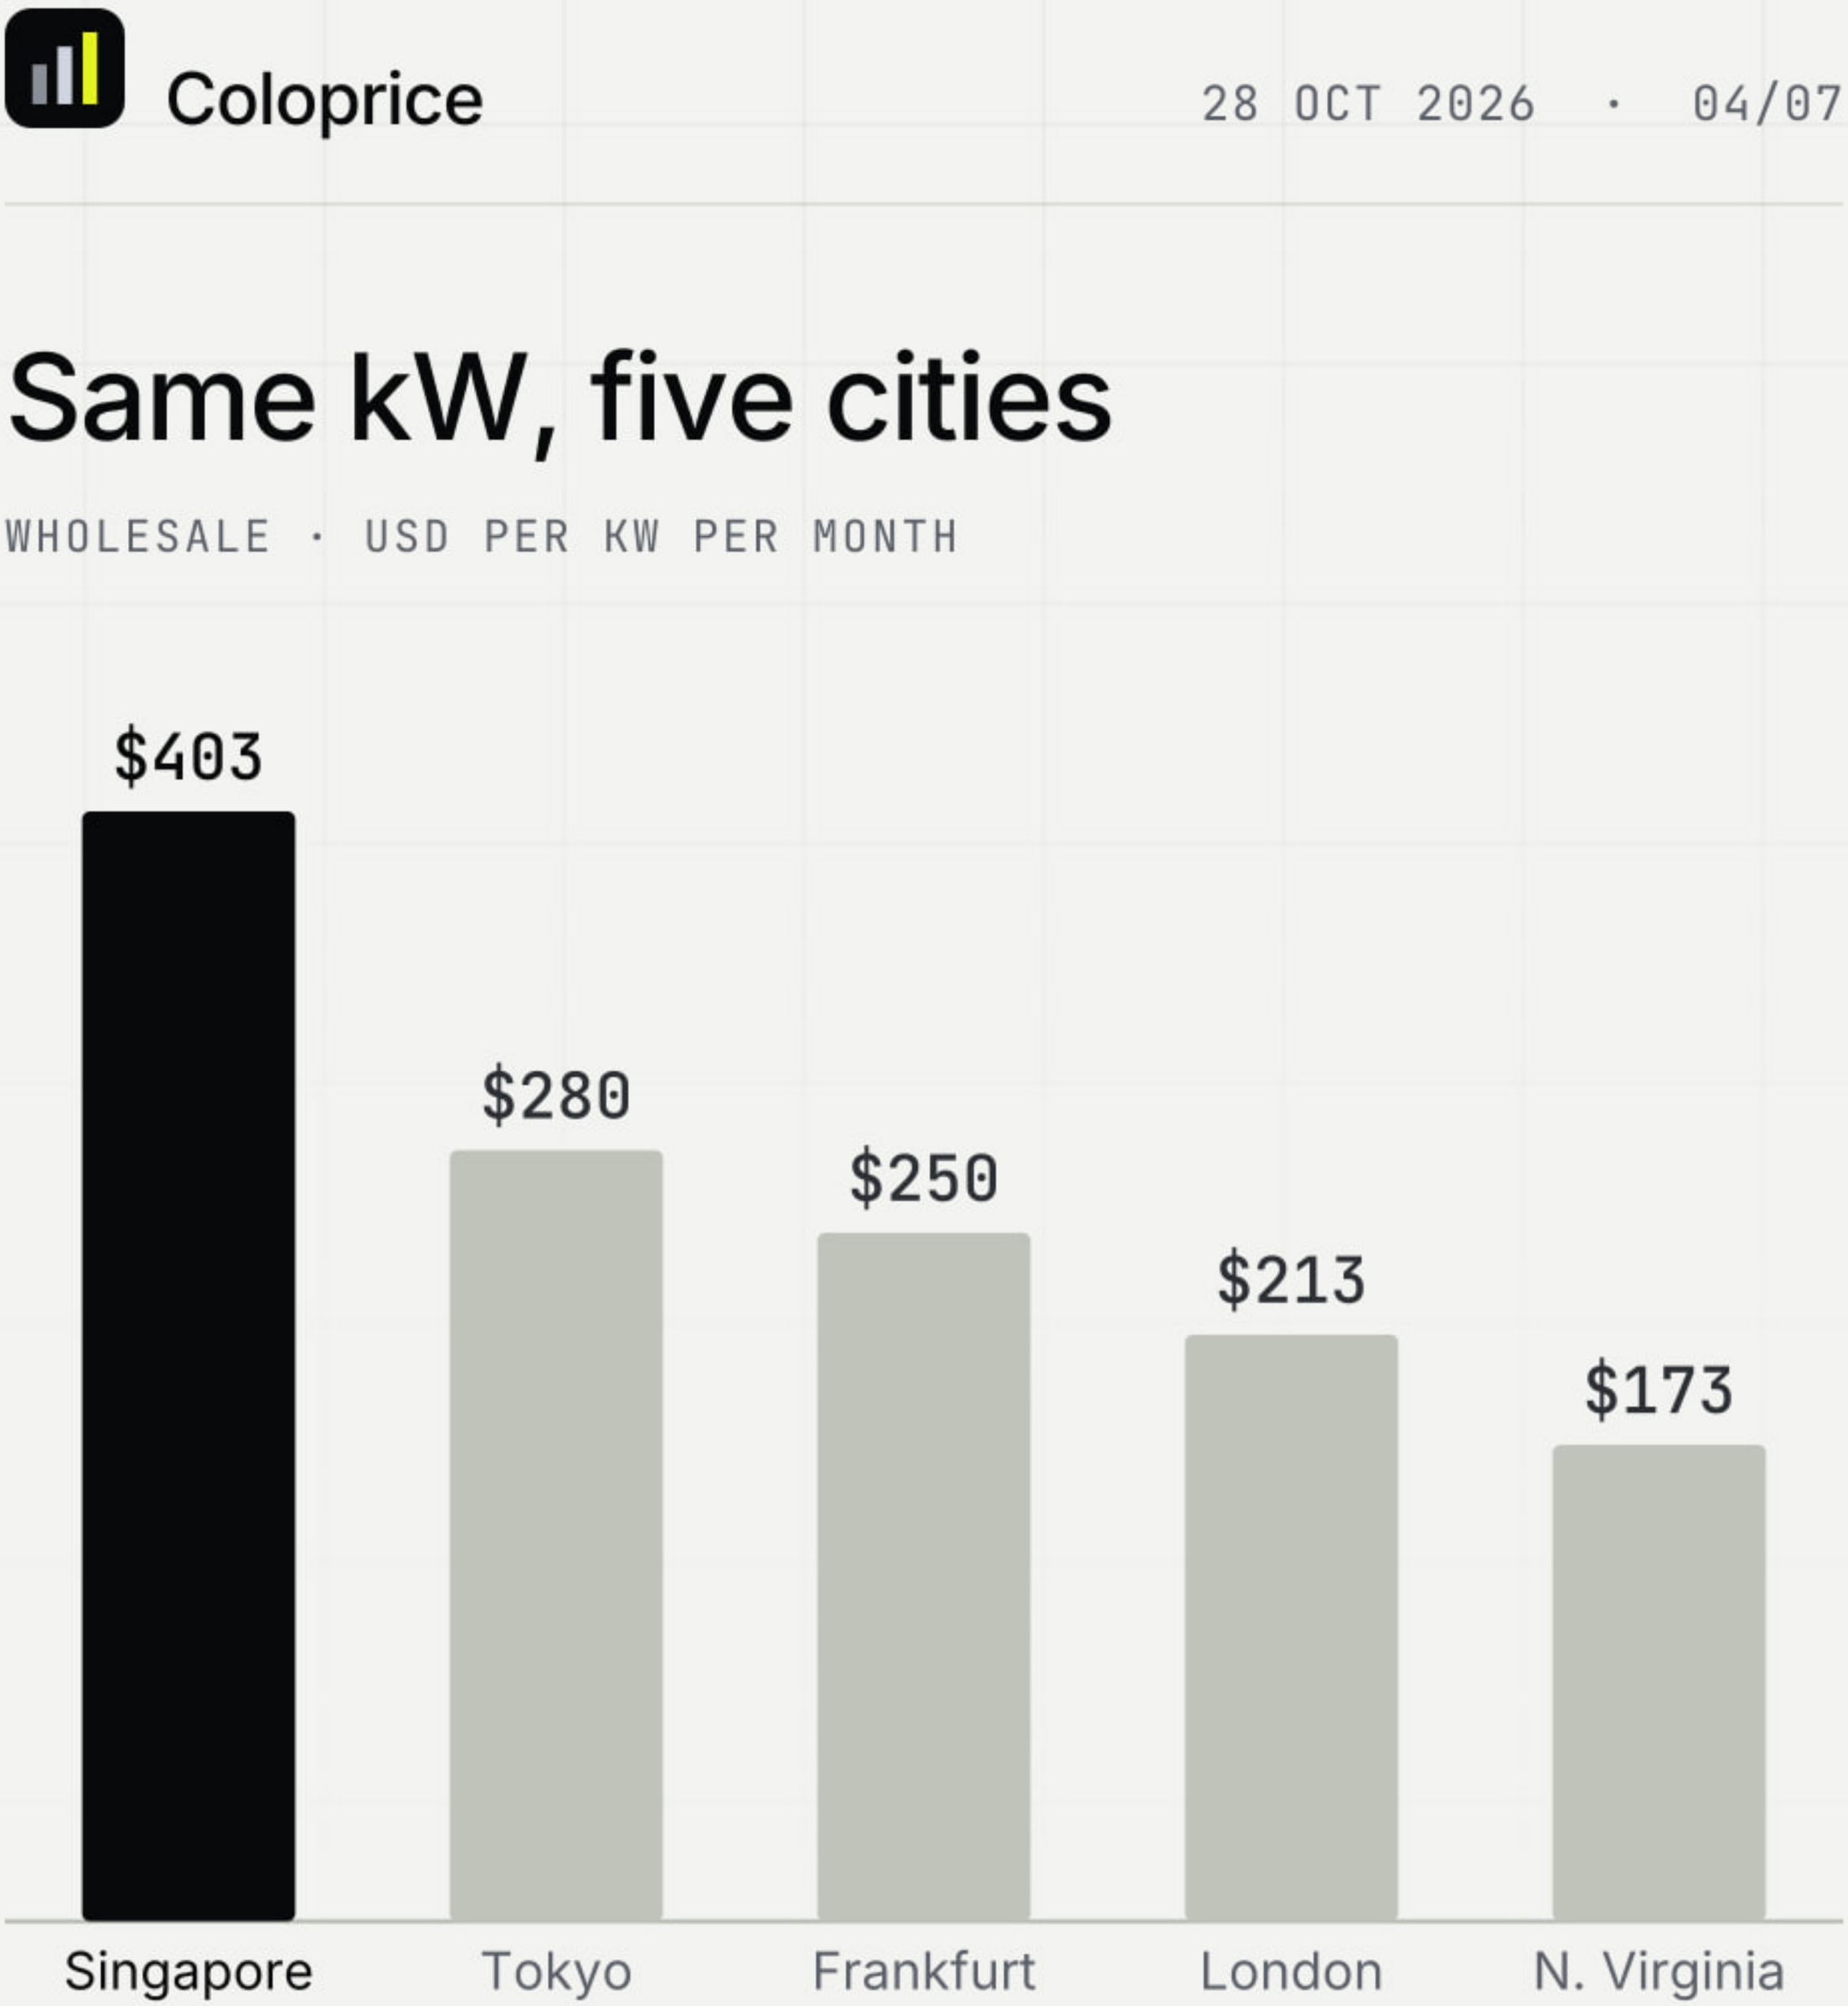

a month at the $200/kW median, before electricity

Most wholesale benchmarks are asking rates for blocks of 250–500 kW. Bigger commitments, like 10 MW+ blocks, price lower per kW.

Same kW, five cities

WHOLESALE · USD PER KW PER MONTH

Where power-ready space is scarce, each kW costs more. Northern Virginia is a 10 MW+ block rate.

Then the power bill: 1 kW running all month uses 730 kWh

ELECTRICITY FOR 730 KWH AT INDICATIVE RATES

VIRGINIA · $0.117/KWH

$85

per kW, per month, on top of the colo price

vs

SINGAPORE · $0.27/KWH

$197

per kW, per month, on top of the colo price

2.3× Singapore's power price vs Virginia's

Three lines to find in any colo quote

COMPARE QUOTES ON THE SAME BASIS

01	**Price per kW of IT load** the committed capacity, billed monthly	$/kW
02	**Metered electricity** billed on top of the kW price	$/kWh
03	**Committed block size** bigger blocks price lower per kW	kW

Wholesale benchmarks exclude metered power. Retail racks (3–5 kW) are priced per rack.
