IDC FRONTIER'S ADVICE TO CUSTOMERS

Prepare a separate environment and rebuild your system.

Customer notice, as reported by SDxCentral. Data in the region may be difficult to recover.

Most incidents we log are physical

COLOPRICE INCIDENT DATABASE · BY CAUSE

141 incidents logged, 31 without a published cause. This attack is filed under other.

THE LESSON FOR BUYERS

Off-site

backups, outside the region that hosts the workload

Customers were told data in the affected region may be difficult to recover, and that they may have to restore from their own backups.
